DATA ACCESSIBILITY AS A PATHWAY TO GENUINE EQUALITY

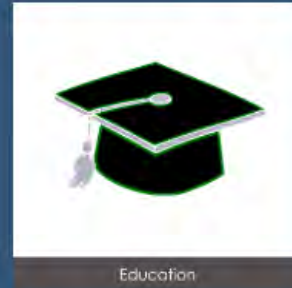

“It's much easier to integrate a lunch counter than it is to guarantee a livable income and a good solid job. It's much easier to guarantee the right to vote than it is to guarantee the right to live in sanitary, decent housing conditions. It is much easier to integrate a public park than it is to make genuine, quality, integrated education a reality. And so today we are struggling for something which says we demand **GENUINE EQUALITY.**”

- excerpted from the 1967 speech “The Other America” given by Dr. Martin Luther King, Jr. former Vine City resident
