Questions likely to be situational...

- Best answers will focus on the Code...
- NOT on how your boss or client might want you to handle the situation.

- Deontological Ethics
 - Concerned with the rightness of an act itself.
 - Moral rights and duties (e.g. Ten Commandments)
 - Kant's principle of humanity (treat humanity never as a means but always as an end)
 - Tend to the procedural (being fair, telling the truth, avoiding conflict of interest, not stealing, no plagiarism, equal opportunity)
- Consequentialist Ethics (Teleological Ethics)
 - Concerned with the goodness of the consequences of action.
 - e.g.. utilitarianism ("greatest good to the greatest number"; balance of pleasure over pain)
 - Often involve the Public Interest (economic efficiency, environmental protection, collective goods provision, public welfare, equity, redistribution).

Deontological

- Adequate, timely, clear information
- Illegal actions
- Advocate adverse to previous position
- Moonlighting/accepting outside gain
- Ex parte communication
- Misrepresent qualifications
- No work outside areas of competence

Consequentialist

- Concern for long range consequences
- Expand choice and opportunity for all persons
- Promote excellence of design
- Conscious of rights *of others*
- *Endeavor to conserve* natural environment

Section A contains a statement of ***aspirational principles*** that constitute the ideals to which we are committed. We shall strive to act in accordance with our stated principles. However, an allegation that we failed to achieve our aspirational principles cannot be the subject of a misconduct charge or be a cause for disciplinary action.

Section B contains ***rules of conduct*** to which we are held accountable. If we violate any of these rules, we can be the object of a charge of misconduct and shall have the responsibility of responding to and cooperating with the investigation and enforcement procedures. If we are found to be blameworthy by the AICP Ethics Committee, we shall be subject to the imposition of sanctions that may include loss of our certification.

Deontological
(all here are Rules of Conduct)

- Adequate, timely, clear information
- Illegal actions
- Advocate adverse to previous position
- Moonlighting/accepting outside gain
- Ex parte communication
- Misrepresent qualifications
- No work outside areas of competence

Consequentialist: (all here are aspirational principles)

- Concern for long range consequences
- Expand choice and opportunity for all persons
- Promote excellence of design
- Conscious of rights of others
- Endeavor to conserve natural environment

2005 Code Revisions

...the new code distinguishes between principles and rules, but it appears that the AICPA only intends to hold members accountable to the rules section. Reportedly, the legal world demanded enforcement clarity. The "Principles to Which We Aspire" are still there, of course, some expanded, some strengthened, and some watered down. The planner's primary obligation to the public interest is still a guiding principle, but not a rule. The AICPA has also weighed in on finding an ethical balance. In those hopefully rare cases when the rules conflict with the principles, I feel that I must advise students intending to join the AICPA to follow the rules. Presumably, the new code still holds the power to inspire, although it won't be in quite the same elegant way that the old code did. I miss it already.
