Chapter 110-12-1, effective March 1, 2014 or the most recent version available during the contract period.

II. MINIMUM PROJECT SCOPE

A. Purpose:

The purpose of this project is to update the currently adopted Comprehensive Plan for Spalding County in accordance with all the rules of the Georgia Department of Community Affairs, Office of Planning and Quality Growth and associated State and Federal laws.

The plan should incorporate sub-plans and studies that have been completed since the adoption of the Spalding County Comprehensive Plan in 2004 and the partial update in 2009. These include, but are not limited to:

- The Spalding County Wastewater Management Plan
- The Spalding County Solid Waste Management Plan
- The Spalding County Comprehensive Transportation Plan
- The Spalding County Recreation Master Plan
- The North Griffin Redevelopment Plan
- Tri-County Crossing LCI
B. Required Components

1. Identification of Community Goals

Spalding County’s Community Goals element should be updated to effectively represent the community’s vision and direction for the future. The Consultant will lead interactive discussions with the community, staff, and stakeholders to gain meaningful participation and input in order to either prepare a new vision statement, list of community goals and/or policies, or Character Area-specific goals along with a defining narrative. This should be an organic process that allows the community to actively participate in setting the County’s direction for the future.

2. Need and Opportunities

The Consultant will assist the County staff and community stakeholders in establishing a Needs and Opportunities list. The list will be developed through the SWOT (strengths, weaknesses, opportunities and threats) or similar analysis of the community and then prioritized as community objectives. Needs and Opportunities that the community identifies as high priority must be followed-up with corresponding implementation measures in the Community Work Program (CWP).

3. Community Work Program

The Consultant will help establish the Community Work Program to incorporate the Needs and Opportunities identified during the process and recommend implementation measures and specific activities the community plans to undertake during the next five years so as to address the priority Needs and Opportunities, identified Target Areas (if applicable), or to achieve portions of the Community Goals. This includes any activities, initiatives, programs, ordinances, administrative systems (such as site plan review, etc.) to be put in place to implement the plan. The Community Work Program will include the following information for each listed activity:

- Brief description of the activity;
- Legal authorization for the activity, if applicable;
- Timeframe for initiating and completing the activity;
- Responsible party for implementing the activity;
- Estimated cost (if any) of implementing the activity; and
- Funding source(s), if applicable
4. Capital Improvements

The Consultant will help update the County’s Capital Improvements Element along with the corresponding Short Term Work Program with input from the staff and stakeholders.

C. Additional Components

1 Population: Demographic statistics will be inventoried per the DCA requirements. The primary data source used will be the latest available U.S. Census data. More recent estimates will be used to supplement the Census data and identify where immediate trends have shifted or accelerated.

2 Economic Development: The Consultant will identify any new Needs and Opportunities related to economic development and vitality of the community. Some considerations include:
   - Demographics overview and analysis
   - Socio economic analysis
   - Infrastructure and commuting analysis
   - Education performance data – K-12 and Higher Ed
   - Coordinate with local educational institutions to offer programs that support job needs in the local community to retain local talent
   - Explore new funding sources like TADs, CID’s etc.
   - Evaluate zoning for increased commercial opportunities along Arthur K. Bolton Parkway

3 Housing: Spalding County has Issues and Opportunities identified in the Partial Update of 2009 that should be updated and incorporated into a current housing element. The Consultant should review the existing Issues and Opportunities evaluating their current relevance using the following factors:
   - Housing types and mix
   - Condition and occupancy
   - Local cost of housing
   - Median single-family home values
   - Assessment of housing supply and projection of future housing needs based on population data trends
   - Address maintenance of foreclosed and/or vacant subdivisions

4 The remaining elements consisting of Natural and Cultural Resources, Community Facilities, Land Use and Development, Intergovernmental Coordination, and Transportation shall be reviewed and updated as determined necessary through the process.
D. GIS Data Collection and Organization

1. The Client anticipates the use of spatial data compiled in GIS, including all data layers necessary to develop the Existing Land Use Map. Population and demographic trends, political jurisdictions, natural and cultural resources areas, and community facilities and services will be located and compiled into spatial data layers to allow the creation of data overlays that will be used to create the Existing Land Use Plan and the Future Land Use Map, and to facilitate discussion in Stakeholder meetings, public meetings, meetings with the staff and other officials, and future use of the plan. Mapping will be coordinated with the RDC and DCA to ensure that the plan addresses regional and State-wide concerns. Data layers will be provided in the form of ESRI Shapefiles, and the Consultant will coordinate with the projection information for the Shapefiles with the County. Existing GIS data will be utilized in order to take advantage of the knowledge and experience currently imbedded in existing database schemas. Other database objects that will be addressed are the transportation network and other components, which will have the opportunity to interact with these databases. The purpose of the database design is to ensure that the design looks at the big picture.

Taking this approach will help to identify as many database objects as possible in order to produce a design that will be through while still retaining the ability to scale the design in the future.

Key GIS Maps for Production or Updates:

- Location Map
- Existing Land Use Map
- Future Land Use Map
- Areas Requiring Special Attention Map
